

CORRESPONDENTS' GUIDELINES No 3

Subject: Certificate for subsequent non-interim recovery or disposal according to Article 15(e) of Regulation (EC) No 1013/2006 on shipments of waste

These correspondents' guidelines represent the common understanding of all Member States on how Regulation (EC) No 1013/2006 on shipments of waste should be interpreted. The guidelines were agreed by the correspondents at a meeting on 14/15 June 2007 organised pursuant to Article 57 of Regulation (EC) No 1013/2006. They are not legally binding. The binding interpretation of Community law is the exclusive competence of the European Court of Justice. The guidelines apply from 12 July 2007 and should be reviewed at the latest five years from the above date and, if necessary, revised.

According to Article 15(e) of Regulation (EC) No 1013/2006 on shipments of waste, when a recovery or disposal facility which carries out an interim recovery or disposal operation delivers waste for any subsequent interim or non-interim recovery or disposal operation to a facility located in the country of destination, it shall obtain a certificate from that facility that the subsequent non-interim recovery or disposal operation has been completed. In addition, it shall promptly transmit the certificate(s), identifying the shipment(s) to which the certificate(s) pertain.

A movement document cannot be used for this certificate because no movement document is to accompany the transport from the recovery or disposal facility which carries out an interim recovery or disposal operation to the facilities which carry out any subsequent interim or non-interim recovery or disposal operations.

It is unclear which information is to be provided in a certificate according to Article 15(e) of Regulation (EC) No 1013/2006. There is a need to achieve a Community-wide approach in order to ensure that all competent authorities in Member States receive the same information.

As a common understanding of the correspondents it was agreed that the minimum information set out in the document in Annex 1 should be provided in a certificate according to Article 15(e). The specific instructions for completing the document in Annex 1, as contained in Annex 2, were also agreed. In addition, in order to keep track of the information set out in the document in Annex 1, it was agreed that, alternatively, the extended information set out in the document in Annex 3, instead of Annex 1, may be provided in a certificate according to Article 15(e). The specific instructions for completing the document in Annex 3, as contained in Annex 4, were also agreed.

In addition, it was noted that competent authorities may require that the obligation on the facility of destination, according to Article 5(4)(a) of Regulation (EC) No 1013/2006, to provide the certificates according to Article 15(e) is to be fulfilled by completing the document in Annex 1 is to be included in the contract. The competent authorities may alternatively require completing the document in Annex 3 to be included in the contract.

It was also agreed that in case Article 15(e) applies, Article 16(e) does not apply.

Specific instructions for completing the document in Annex 3

1. The interim disposal or recovery facility referred to in block 3 is to complete blocks 1-5, 14-16, 18 and 19 or, in case a subsequent interim disposal or recovery takes place, blocks 1-8, 10, 11, 15, 16, 18 and 19. In addition, this facility is to transmit the document to the subsequent non-interim disposal or recovery facility referred to in block 18 or, in case a subsequent interim disposal or recovery takes place, to the subsequent interim disposal or recovery facility referred to in block 10. In case more than one interim disposal or recovery takes place, attachments to the document in Annex 1 should be used which are to be completed as mentioned above, but only blocks 6-14 are to be completed.
2. Blocks 6-8 refer to the input into a subsequent interim disposal or recovery facility. Blocks 14-16 refer to the input into the subsequent non-interim disposal or recovery facility. In case the interim disposal or recovery facility referred to in block 3 carries out mixing or sorting of the waste shipped under the notification and shipment(s) referred to in blocks 1 and 2, the waste referred to in blocks 6-8 and blocks 14-16 may cover waste from different notifications, different shipments under a general notification and waste generated in the country of destination.
3. If a subsequent interim disposal or recovery takes place, the subsequent interim disposal or recovery facility referred to in block 10 is to complete blocks 9, 12, 13 and 14. In addition, it is to transmit the document to a subsequent non-interim disposal or recovery facility or, in case more than one interim disposal or recovery takes place, to another subsequent interim disposal or recovery facility. In case more than one interim disposal or recovery takes place, each subsequent interim disposal or recovery facility is to complete the relevant attachment as mentioned above.
4. The subsequent non-interim disposal or recovery facility referred to in block 18 is to complete blocks 17, 20 and 21. In addition, it is to transmit the document to the interim disposal or recovery facility referred to in block 3.
5. The interim disposal or recovery facility referred to in block 3 is to transmit the completed document to the notifier and the competent authorities concerned.
