German suggestions
for filling Annex IIIA of the
Regulation No 1013/2006 on shipments of waste

Annex IIIA

The following entries are suggested to be listed in Annex IIIA:

Mixtures of B1010 and B1031
Mixtures of B1010 and B1070
Mixtures of B1010 and B1080
Mixtures of bottle stoppers consisting of B1010 or B3010
Mixtures of B1020 and B1060
Mixtures of B3040 and B3080
Mixtures of B3060 and B3070
Mixtures of B3090 and B3110
Mixtures of GC010 and GC020

Rationale:

Most of the mixtures suggested are mixtures of the same material but in a different physical form (e. g. certain metals under B1010 in non-dispersible form and the same metals under B1031 in dispersible form). According to our knowledge, the above mentioned mixtures can be recovered in an environmentally sound manner.

In addition, it is noted that in our view mixtures of wastes which are listed under one entry (e. g. a mixture of copper scrap and nickel scrap under B1010 or a mixture of ethylene and polypropylene under B3010) have still this entry (i. e. B1010 and B3010 respectively) and therefore fall under the general information procedure laid down in Article 18, they need not to be listed in Annex IIIA. It is also noted that in some cases restrictions regarding mixtures are contained in the text of an entry (e.g. B3010, BB3030).
